MT. SHUKSAN
DEEP BOX
SOLID FUEL CHARBROILER

Job Name	
Model	WS-SFB-DB
Item#	

WS-SFB-34-DB model shown.

The Mt. Shuksan Charbroiler features a "heat sink" style firebox; cast from our dense, durable high-temperature ceramic. The firebox is contained within a heavy-duty, insulated, stainless steel cabinet. The Mt. Shuksan is designed to store and radiate heat evenly. The grill is comprised of 6-inch x 24-inch sliding cast iron grates which rest on a warp-resistant, stainless steel frame. The grates slope upward toward the back of the firebox to allow for easier grilling. A relatively small amount of fuel (seasoned hardwood or hardwood charcoal) will keep the entire firebox saturated with heat, which is evenly radiated up to the grill surface. There are no ash dropouts or vents in the firebox, so "fuel-wasting" airflow is minimized. An experienced solid fuel grill operator will be impressed by the even heat delivery and fuel-saving design of the Mt. Shuksan. A unique lift-up door allows easy access to the firebox in order to load fuel from the front. The unit comes standard on 4 heavy-duty, swiveling casters (2 with locking brakes). An ash shovel and coal/grate tool are included with the charbroiler.

The unit is available in three different sizes and arrives completely assembled, ETL Listed, ready to install, and is made in the USA. Information about, tools and accessories can be found online at: woodstone-corp.com.

FEATURES

- Durable Ceramic Firebox Construction
- Reduced Fuel Consumption
- Even, Consistent Heat
- Solid Fuel
- Wide Range of Sizes
- Accommodates larger wood for easier fire management
